

PUBLIC NOTICE

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Notice of Lead Service Line Material Inventory

Public water System Name: Quemado Mutual Water & Sewage Works Association

PWS ID# NM3500202

Date: July 23, 2025

Dear Drinking Water Consumer,

This notice contains important information about your drinking water. Please share this notice with anyone who drinks or utilizes drinking water from this water system. This includes not only residents but also individuals in apartments, nursing homes, schools, businesses, and childcare facilities located here. It is important that everyone who uses this water is informed.

As part of the EPA's Lead and Copper Rule, all public water systems are required to develop a complete inventory of their service lines, including the material composition of each line. The deadline to submit this inventory was October 16, 2024.

Our system was unable to meet this deadline, but we are actively working to compile the required inventory. Once this process is complete, we will notify you if any service lines within the system are identified as containing lead, galvanized metal requiring replacement, or if the material composition is unknown.

We appreciate your patience and cooperation as we work to meet federal requirements and ensure the continued safety of your drinking water.

If you have questions concerning any of the information provided in this notice, or if you have information that could help us better describe your service line, contact us via:

Water System Contact Person:
